

SUMMER CAMP 2017

...A NATURAL EXPERIENCE...FOR THE JOY OF LEARNING

"Science is an exciting subject to teach! We are surrounded by a spectacular and mysterious world that students are ready to explore" Laura Cohen

As Albert Einstein said, " The most beautiful thing we can experience is the mysterious. It is the source of all the true art and science."

This summer through experiments, fine art, singing, planting, tasting, cooking, botany and reading we will uncover the mysteries of nature. Please join our adventure as we engage all of our senses to find out why?

Summer School ~ Registration Fee \$50.00
