

COVID-19 Prevention Program (CPP) for

Montessori School of Corona

This CPP is designed to control exposures to the SARS-CoV-2 virus that may occur in our workplace.

Date: January 25, 2021

Authority and Responsibility

Sandra Perez, Administrator, Mahima Varma, Director have overall authority and responsibility for implementing the provisions of this CPP in our workplace. In addition, all managers and supervisors are responsible for implementing and maintaining the CPP in their assigned work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Identification and Evaluation of COVID-19 Hazards

We will implement the following in our workplace:

- Conduct workplace-specific evaluations using the **Appendix A: Identification of COVID-19 Hazards** form.
- Evaluate employees' potential workplace exposures to all persons at, or who may enter, our workplace.
- Review applicable orders and general and industry-specific guidance from the State of California, Cal/OSHA, and the local health department related to COVID-19 hazards and prevention.
- Evaluate existing COVID-19 prevention controls in our workplace and the need for different or additional controls.
- Conduct periodic inspections using the **Appendix B: COVID-19 Inspections form** as needed to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with our COVID-19 policies and procedures.

These are the QUESTIONS that you will be asked daily before entering the facility.

1. Has your child/children experienced fever, cough, chills, fatigue, muscle pain, headache, sore throat, runny nose, nausea or vomiting, diarrhea, new loss of taste or smell, difficulty in breathing within the past 24 hours?
2. Has anyone in your household traveled outside the U.S within the last 14 days?
3. Has anyone in your household come in close contact with a patient confirmed COVID-19 infection within the past 24 hours?

Employee participation

Employees and their authorized employees' representatives are encouraged to participate in the identification and evaluation of COVID-19 hazards by:

Being pro-active and doing a visual well check and taking the initiative, if they are displaying any symptoms they are to inform us immediately, we give the option of self-quarantine for 10 days or get a rapid COVID-19 test.

Employee screening

We screen our employees by:

We have them do a self-check prior to entering or arriving on campus followed by a visual check upon arrival along with asking of the questions and a no contact temperature check.

Correction of COVID-19 Hazards

Unsafe or unhealthy work conditions, practices or procedures will be documented on the **Appendix B: COVID-19 Inspections** form, and corrected in a timely manner based on the severity of the hazards, as follows:

[Describe how the following will be accomplished:

The severity of the hazard will be assessed, and correction time frames assigned, accordingly.

Individuals are identified as being responsible for timely correction.

Follow-up measures are taken to ensure timely correction.]

Control of COVID-19 Hazards

Physical Distancing

Where possible, we always ensure at least six feet of physical distancing in our workplace by:

[Describe your specific workplace methods, which can include:

- **Reducing the number of students in the classroom, parent and visitors will have limited access to the school.**
- **Students, staff, and visitors who are symptomatic will NOT be allowed on campus.**
- **Staggered arrival, departure, work, and break times.**
- **Any student or staff exhibiting any symptoms will immediately be isolated.**
- **Teachers are highly encouraged to remain in their Cohort.**

Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.

Face Coverings

We provide clean, undamaged face coverings and ensure they are properly worn by employees over the nose and mouth when indoors, and when outdoors and less than six feet away from another person, including non-employees, and where required by orders from the California Department of Public Health (CDPH) or local health department. **[We have disposable face mask for both students and staff members. We have provided plastic face shields to all employees.**

The following are exceptions to the use of face coverings in our workplace:

- When an employee is alone in a room.
- While eating and drinking at the workplace, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart.

Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19.

Engineering controls

We implement the following measures for situations where we cannot maintain at least six feet between individuals: **[we have added partitions in between each student's desks and teacher's desk.]**

We maximize, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

[describe how this will be accomplished, taking into consideration:

- **Opening classroom doors to maintain airflow.**
- **Having the students work outside when it is feasible.**

Cleaning and disinfecting

We implement the following cleaning and disinfection measures for frequently touched surfaces:

[describe your workplace-specific measures, including:

Students can bring water bottles but must be labeled and taken home every day for washing. If student does not have a water bottle, he or she will be provided with a disposable cup.

Napping Mats are designated for each child in their classroom. They will be cleaned and sanitized after every use.

School will be deep cleaned every weekend.

Unnecessary personal items such as toys from home will NOT be allowed.

Common touch surfaces including restroom fixtures, handrails, door handles, and counter tops will be disinfected several times throughout the day.

Tables used for snacks and lunch will be disinfected before and after each use.

Teach students and remind staff to use tissue to wipe their nose and cough/sneeze inside a tissue or their elbow.

Air filters are changed every 3 months to ensure proper ventilation.

Drinking fountains have been taped off for non-usage.

Classrooms are equipped water source.

We highly recommend and encourage the use of reusable water bottles.

Custodial staff and any other worker who clean and disinfect the school must be equipped with proper protective equipment.

All cleaning products are kept out of children's reach and stored in a space with restricted access.

Should we have a COVID-19 case in our workplace, we will implement the following procedures:

[describe how the cleaning and disinfection will be done of areas, materials, and equipment used by a COVID-19 case during the high-risk exposure period. Address whether an outside service will be used or how the employees you use are properly equipped and trained.]

Shared tools, equipment and personal protective equipment (PPE)

PPE must not be shared, e.g., gloves, goggles and face shields.

Items that employees come in regular physical contact with, such as phones, headsets, desks, keyboards, writing materials, instruments and tools must also not be shared, to the extent feasible.

Where there must be sharing, the items will be disinfected between uses by **[describe how this will be done in your workplace, such as use of a cleaning/sanitizing crew or providing the employees with the materials and training to do it themselves].**

Everyone is mandated to have their own, gloves, goggles, mask face shields.

Sharing of supplies will be prohibited, limited, and avoided between students to the extent possible.

Hand sanitizing

In order to implement effective hand sanitizing procedures, we:

describe your site-specific procedures, including:

Staff and students are expected to wash/sanitize for 20-seconds upon entering the facility, classroom, before and after eating, after coughing or sneezing, after using the restroom, and returning from outside. Staff will model and practice hand washing.

Hand sanitizers will be available in lobby, office, every classroom, and outside.

We are using Ethyl alcohol-based hand sanitizers. We still highly encourage our students and staff to wash hands on a regular basis and NOT use hand sanitizer as a regular form of hand cleansing.

Personal protective equipment (PPE) used to control employees' exposure to COVID-19.

We evaluate the need for PPE (such as gloves, goggles, and face shields) as required by CCR Title 8, section 3380, and provide such PPE as needed.

When it comes to respiratory protection, we evaluate the need in accordance with CCR Title 8 section 5144 when the physical distancing requirements are not feasible or maintained. **[reference section [3205\(c\)\(E\)](#) for details on required respirator and eye protection use.]**

We provide and ensure use of eye protection and respiratory protection in accordance with section 5144 when employees are exposed to procedures that may aerosolize potentially infectious material such as saliva or respiratory tract fluids. [Delete if not applicable to your workplace.]

Investigating and Responding to COVID-19 Cases

This will be accomplished by using the **Appendix C: Investigating COVID-19 Cases** form.

Employees who had potential COVID-19 exposure in our workplace will be:

Areas suspected of being infected by the confirmed individual will be closed off and disinfected before returned to use.

After confirming a positive COVID-19 case, conducting contact tracings,

isolating/quarantining necessary staff or students, and contacting RPHD, administration will be evaluated and determine whether it is necessary to cease in-person instruction based on individual cohorts or the entire school.

Per CDPH guidance, in-person instruction will be discontinued when 5% of a cohort.

(including associated staff) is confirmed with COVID-19 within 14 days.

Per CDPH guidance, in-person instruction will be discontinued school-wide when 50% of the total population (staff and students) test positive within 14 days even if any individual cohort has not reached the 5% threshold.

Students in a cohort that has quarantined will be recommended for testing. Those same students will be required to test should they present symptoms within 14 days.

When a classroom, grade-level cohort, or school is closed for in-person instruction due to reaching the trigger criteria, in-person instruction will not resume until:

The school has been cleaned and disinfected.

There has been a public health investigation.

Results will be recorded daily to be analyzed by administration.

Consultation has with RCHD has taken place.

Student/staff confirmed with COVID-19 will be isolated immediately in Room 10 and be excluded from school for 10 days from symptom onset or test date and will be provided opportunities for them to continue their education during quarantine.

Administration will oversee the contact tracing of the identified student or staff who has tested positive to see who they have been in close contact.

Administration will contact the RCHD to inform them of the positive case and provide the list of contact tracing as needed.

Student / staff identified as a close contact will be quarantined for 14 days from last exposure, provide opportunities for them to continue their education during quarantine, and recommendation for a COVID-19 test would be given.

If a staff member or student is required to be tested for COVID-19, the school will provide information regarding local testing centers and require documentation of the test as well as track the required time of isolation or quarantine.

Montessori School of Corona will work closely with staff to facilitate a regular schedule of testing utilizing local health care providers or other testing services every two months.

In the event threshold is reached to cease in-person instruction, the administration will immediately contact any cohort groups (via email, text, or phone call) to begin distance learning.

If the threshold is reached to cease in-person instruction for the entire school, parents will be notified by email, text or phone calls and distance learning will begin immediately.

[indicate how the following will be accomplished:

- **Offered COVID-19 testing at no cost during their working hours, they are encouraged to visit the Curative.com to get the information required to get tested.**
- **The information on benefits described in Training and Instruction, and Exclusion of COVID-19 Cases, below, will be provided to them.]**

System for Communicating.

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that it includes the following information:

- Who employees should report COVID-19 symptoms and possible hazards to, and how **[Describe how this will be accomplished in your workplace]. They will notify administration by calling or texting.**
- That employees can report symptoms and hazards without fear of reprisal.
- Our procedures or policies for accommodating employees with medical or other conditions that put them at increased risk of severe COVID-19 illness.
- Where testing is not required, how employees can access COVID-19 testing **[determine what options are available for employees to obtain voluntary testing, be it employer provided, available through health plans or local testing centers. The purpose is to give employees the tools to get tested when they have symptoms to reduce the likelihood of bringing the virus to work. This type of voluntary testing does not have to be provided by the employer].**
- In the event we are required to provide testing because of a workplace exposure or outbreak, we will communicate the plan for providing testing and inform affected employees of the reason for the testing and the possible consequences of a positive test. **[If you are required to provide testing because**

of an employee exposure, have a plan for how this will be accomplished at no cost to the employee during working hours, including when the testing is in response to CCR Title 8 section [3205.1](#), Multiple COVID-19 Infections and COVID-19 Outbreaks, as well as section [3205.2](#), Major COVID-19 Outbreaks. It is recommended that the plan be developed in advance for large or high-risk workplaces.] We encourage them to go to their doctor or a COVID-19 clinic to get tested, if they do not wish to get tested, they are required to self-quarantine for 14 days. If multiple cases, the plan will be to close the facility down for the required number of days and resume Virtual instruction

- Information about COVID-19 hazards employees (including other employers and individuals in contact with our workplace) may be exposed to, what is being done to control those hazards, and our COVID-19 policies and procedures.
- **[Describe other aspects of your system of COVID-19 related communication being implemented in your workplace]. See Above**

Training and Instruction

We will provide effective training and instruction that includes:

- Our COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which the employee may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms.
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment - face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- **[Describe other aspects of your training being implemented in your workplace]. All the above are being discussed on a regular basis along with everyone staying in their cohort classroom.**

Appendix D: COVID-19 Training Roster will be used to document this training.

Exclusion of COVID-19 Cases

Where we have a COVID-19 case in our workplace, we will limit transmission by:

- Ensuring that COVID-19 cases are excluded from the workplace until our return-to-work requirements are met.
- Excluding employees with COVID-19 exposure from the workplace for 14 days after the last known COVID-19 exposure to a COVID-19 case.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever we've demonstrated that the COVID-19 exposure is work related. This will be accomplished by **[describe how your workplace will accomplish this, such as by employer-**

provided employee sick leave benefits, payments from public sources or other means of maintaining earnings, rights, and benefits, where permitted by law and when not covered by workers' compensation]. Yes, they will be able to maintain their payroll, seniority and employee rights.

- Providing employees at the time of exclusion with information on available benefits.

Reporting, Recordkeeping, and Access

It is our policy to:

- Report information about COVID-19 cases at our workplace to the local health department whenever required by law, and provide any related information requested by the local health department.
- Report immediately to Cal/OSHA any COVID-19-related serious illnesses or death, as defined under CCR Title 8 section 330(h), of an employee occurring in our place of employment or in connection with any employment.
- Maintain records of the steps taken to implement our written COVID-19 Prevention Program in accordance with CCR Title 8 section 3203(b).
- Make our written COVID-19 Prevention Program available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.
- Use the **Appendix C: Investigating COVID-19 Cases** form to keep a record of and track all COVID-19 cases. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.
- **[add any additional measure you are taking.] COVID-19 School Guidance Checklist and Unusual incident report will be submitted to Riv. County Health Dept. and Community Care Licensing**

Return-to-Work Criteria

- COVID-19 cases with COVID-19 symptoms will not return to work until all the following have occurred:
 - At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications.
 - COVID-19 symptoms have improved.
 - At least 10 days have passed since COVID-19 symptoms first appeared.
 - COVID-19 cases who tested positive but never developed COVID-19 symptoms will not return to work until a minimum of 10 days have passed since the date of specimen collection of their first positive COVID-19 test.
 - A negative COVID-19 test will not be required for an employee to return to work.
 - If an order to isolate or quarantine an employee is issued by a local or state health official, the employee will not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period will be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.
-

Makima Varma

Sandra Perez, Administrator 1/29/2021

Appendix B: COVID-19 Inspections

[This form is only intended to get you started. Review the information available at www.dir.ca.gov/dosh/coronavirus/ for additional guidance on what to regularly inspect for, including issues that may be more pertinent to your particular type of workplace. You will need to modify form accordingly.]

Date: []

Name of person conducting the inspection: Sandra Perez and Tabitha Moraldo

Work location evaluated:

Exposure Controls	Status	Person Assigned to Correct	Date Corrected
Engineering			
Barriers/partitions	Active	Sandra Perez	Daily
Ventilation (amount of fresh air and filtration maximized)	Doors Opened	Sandra Pe4rez	Daily
Additional room air filtration			
Students work outside when weather permits	Active	Sandra Perez	
Staggered arrival, lunch, play and departure times	Active	Sandra	
Administrative			
Physical distancing	Active		
Surface cleaning and disinfection (frequently enough and adequate supplies)	Active		Daily
Hand washing facilities (adequate numbers and supplies)	Active		Daily
Disinfecting and hand sanitizing solutions being used according to manufacturer instructions	Active		
Everyone is mandated to wear a face shield or mask	Active		
Mandated to wash their hands when they leave and enter rooms	Active		
PPE (not shared, available and being worn)	Active		
Face coverings (cleaned sufficiently often)	Active		
Gloves	Active		
Face shields/goggles	Active		
Respiratory protection	N/A		

Appendix C: Investigating COVID-19 Cases

All personal identifying information of COVID-19 cases or symptoms will be kept confidential. All COVID-19 testing, or related medical services provided by us will be provided in a manner that ensures the confidentiality of employees, with the exception of unredacted information on COVID-19 cases that will be provided immediately upon request to the local health department, CDPH, Cal/OSHA, the National Institute for Occupational Safety and Health (NIOSH), or as otherwise required by law.

All employees' medical records will also be kept confidential and not disclosed or reported without the employee's express written consent to any person within or outside the workplace, with the following exceptions: (1) Unredacted medical records provided to the local health department, CDPH, Cal/OSHA, NIOSH, or as otherwise required by law immediately upon request; and (2) Records that do not contain individually identifiable medical information or from which individually identifiable medical information has been removed.

Date: []

Name of person conducting the investigation: **Sandra Perez or Tabitha Moraldo**

Employee (or non-employee*) name:		Occupation (if non-employee, why they were in the workplace):	
Location where employee worked (or non-employee was present in the workplace):		Date investigation was initiated:	
Was COVID-19 test offered?		Name(s) of staff involved in the investigation:	
Date and time the COVID-19 case was last present in the workplace:		Date of the positive or negative test and/or diagnosis:	
Date the case first had one or more COVID-19 symptoms:		Information received regarding COVID-19 test results and onset of symptoms (attach documentation):	

Results of the evaluation of the COVID-19 case and all locations at the workplace that may have been visited by the COVID-19 case during the high-risk exposure period, and who may have been exposed (attach additional information):

Notice given (within one business day, in a way that does not reveal any personal identifying information of the COVID-19 case) of the potential COVID-19 exposure to:			
All employees who may have had COVID-19 exposure and their authorized representatives.	Date:		
	Names of employees that were notified:		
Independent contractors and other employers present at the workplace during the high-risk exposure period.	Date:		
	Names of individuals that were notified:		
What were the workplace conditions that could have contributed to the risk of COVID-19 exposure?		What could be done to reduce exposure to COVID-19?	
Was local health department notified?		Date:	

*Should an employer be made aware of a non-employee infection source COVID-19 status.

Additional Consideration #1

Multiple COVID-19 Infections and COVID-19 Outbreaks

[This section will need to be added to your CPP if your workplace is identified by a local health department as the location of a COVID-19 outbreak, or there are three or more COVID-19 cases in your workplace within a 14-day period. Reference section [3205.1](#) for details.]

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

- We will provide COVID-19 testing to all employees in our exposed workplace except for employees who were not present during the period of an outbreak identified by a local health department or the relevant 14-day period. COVID-19 testing will be provided at no cost to employees during employees' working hours.
- COVID-19 testing consists of the following:
 - All employees in our exposed workplace will be immediately tested and then tested again one week later. Negative COVID-19 test results of employees with COVID-19 exposure will not impact the duration of any quarantine period required by, or orders issued by, the local health department.
 - After the first two COVID-19 tests, we will continue to provide COVID-19 testing of employees who remain at the workplace at least once per week, or more frequently if recommended by the local health department, until there are no new COVID-19 cases detected in our workplace for a 14-day period.
 - We will provide additional testing when deemed necessary by Cal/OSHA.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees who had COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria** requirements, and local health officer orders if applicable.

Investigation of workplace COVID-19 illness

We will immediately investigate and determine possible workplace-related factors that contributed to the COVID-19 outbreak in accordance with our CPP **Investigating and Responding to COVID-19 Cases**.

COVID-19 investigation, review and hazard correction

In addition to our CPP **Identification and Evaluation of COVID-19 Hazards** and **Correction of COVID-19 Hazards**, we will immediately perform a review of potentially relevant COVID-19 policies, procedures, and controls and implement changes as needed to prevent further spread of COVID-19.

The investigation and review will be documented and include:

- Investigation of new or unabated COVID-19 hazards including:
 - Our leave policies and practices and whether employees are discouraged from remaining home when sick.
 - Our COVID-19 testing policies.
 - Insufficient outdoor air.
 - Insufficient air filtration.
 - Lack of physical distancing.
- Updating the review:
 - Every thirty days that the outbreak continues.
 - In response to new information or to new or previously unrecognized COVID-19 hazards.
 - When otherwise necessary.
- Implementing changes to reduce the transmission of COVID-19 based on the investigation and

review. We will consider:

- Moving indoor tasks outdoors or having them performed remotely.
- Increasing outdoor air supply when work is done indoors.
- Improving air filtration.
- Increasing physical distancing as much as possible.
- Respiratory protection.
- **Moving to virtual learning on a as needed basis.**

Notifications to the local health department

- Immediately, but no longer than 48 hours after learning of three or more COVID-19 cases in our workplace, we will contact the local health department for guidance on preventing the further spread of COVID-19 within the workplace.
- We will provide to the local health department the total number of COVID-19 cases and for each COVID-19 case, the name, contact information, occupation, workplace location, business address, the hospitalization and/or fatality status, and North American Industry Classification System code of the workplace of the COVID-19 case, and any other information requested by the local health department. We will continue to give notice to the local health department of any subsequent COVID-19 cases at our workplace.

Additional Consideration #2

Major COVID-19 Outbreaks

[This section will need to be added to your CPP should your workplace experience 20 or more COVID-19 cases within a 30-day period. Reference section [3205.2](#) for details.]

This section of CPP will stay in effect until there are no new COVID-19 cases detected in our workplace for a 14-day period.

COVID-19 testing

We will provide twice a week COVID-19 testing, or more frequently if recommended by the local health department, to all employees present at our exposed workplace during the relevant 30-day period(s) and who remain at the workplace. COVID-19 testing will be provided at no cost to employees during employees' working hours.

Exclusion of COVID-19 cases

We will ensure COVID-19 cases and employees with COVID-19 exposure are excluded from the workplace in accordance with our CPP **Exclusion of COVID-19 Cases** and **Return to Work Criteria**, and any relevant local health department orders.

Investigation of workplace COVID-19 illnesses

We will comply with the requirements of our CPP **Investigating and Responding to COVID-19 Cases**.

COVID-19 hazard correction

In addition to the requirements of our CPP **Correction of COVID-19 Hazards**, we will take the following actions:

- In buildings or structures with mechanical ventilation, we will filter recirculated air with Minimum Efficiency Reporting Value (MERV) 13 or higher efficiency filters if compatible with the ventilation system. If MERV-13 or higher filters are not compatible with the ventilation system, we will use filters with the highest compatible filtering efficiency. We will also evaluate whether portable or mounted High Efficiency Particulate Air (HEPA) filtration units, or other air cleaning systems would reduce the risk of transmission and implement their use to the degree feasible.
- We will determine the need for a respiratory protection program or changes to an existing respiratory

protection program under CCR Title 8 section 5144 to address COVID-19 hazards.

- We will evaluate whether to halt some or all operations at our workplace until COVID-19 hazards have been corrected.
- Implement any other control measures deemed necessary by Cal/OSHA.

Notifications to the local health department

We will comply with the requirements of our **Multiple COVID-19 Infections** and **COVID-19 Outbreaks-Notifications to the Local Health Department**.

Additional Consideration #3

COVID-19 Prevention in Employer-Provided Housing

[N/A]

Additional Consideration #4

COVID-19 Prevention in Employer-Provided Transportation to and from Work

[N/A]
